**Live Teleconference Infrared Training - For The Home Inspector
& On-site Training Anywhere In The United States Or Canada
Infrared Certification Only \$500 . . . www.Infrared-Certified.com**

Course: “Thermal Imaging & Building Science”

8am to 5pm CST - Including Breaks - Two Days – 16 Hours CE

This course is intended to prepare the Home Inspector to properly use a Thermal Camera with regards to home inspections. There will be sections on the theory of electromagnetic radiation, thermodynamics, and building science. There will also be examples of field use and how to properly interpret images, along with instructions about report writing, liability, marketing and testing.
